

## Soyabean Casein Digest Medium with 1% Polysorbate 80 and 0.5% Soya Lecithin

### Intended Use

Soyabean Casein Digest Medium with 1% Polysorbate 80 and 0.5% Soya Lecithin is used for validation of cleanliness on surfaces of containers, equipment surfaces and water miscible cosmetics.

### Summary

Soyabean Casein Digest Medium with 1% Polysorbate 80 and 0.5% Soya Lecithin is used for the detection and enumeration of microorganisms on surfaces of sanitary importance, water miscible cosmetics, products containing antimicrobials or preservatives.

### Principle

Pancreatic digest of casein and papaic digest of soyabean meal provide essential nutrients. Glucose serves as source of fermentable carbohydrate for the energy production. Sodium chloride maintains osmotic balance while dibasic hydrogen phosphate provides buffering capacity. Lecithin is incorporated to neutralize any residual disinfectant activity. Polysorbate 80 neutralizes substituted phenolics.
